Summary

Software Engineer with experience in Python, AI/ML, backend systems, and functional programming. Skilled in LLMs, LangGraph, prompt engineering, and computer vision. Proven ability to build production systems and deliver code through async, remote environments.

Skills

- **Programming:** Python (advanced), Haskell (proficient), Rust (basic), SQL, GraphQL
- **AI/ML:** LLMs (Claude, GPT, Ollama), LangGraph, LangChain, prompt engineering, PyTorch, TensorFlow, scikit-learn, Computer Vision (OpenCV, VLMs)
- **Backend:** FastAPI, REST APIs, data pipelines, PostgreSQL, pgvector
- **MLOps:** MLflow, experiment tracking, model deployment, monitoring
- **Cloud:** AWS (S3, SES), Azure (Azure ML)
- **Tools:** Docker, Git, Linux, Jupyter
- **Languages:** Portuguese (native), English (advanced), Spanish (basic)

Experience

Data Scientist (Remote)

Paipe | Sep 2024 - Present

- Develop and deploy AI solutions for commercial clients in production environment.
- Build and maintain Python backend services and APIs using FastAPI.
- Design and execute evaluation protocols for machine learning models.

AI Agent Developer

Paipe | 2024 - Present

- Build intelligent agents using LLMs (Claude/GPT) and LangGraph with tool calling and structured output.
- Implement evaluation frameworks with golden datasets and regression tests.
- Design prompt engineering solutions for reliable agent responses.

Graduate Researcher - AI/ML

UFPel | 2024 - Present

- Develop ML pipelines for behavior classification using deep learning (PyTorch, TensorFlow).
- Design evaluation frameworks with statistical validation (Cohen's kappa, macro F1).
- Maintain prompt library with versioned templates across model configurations.

Projects

OpenJarvis (Open Source)

- Contributed 9 merged PRs to a local-first AI agent framework (Python + Rust).
- Designed prompts and system instructions for multi-agent orchestration.
- Collaborated asynchronously via issue trackers and written proposals.

Multimodal Video Annotation (M.Sc. Thesis)

- Built pipeline for behavior classification from screen recordings using Vision-Language Models (Qwen2.5-VL).
- Designed evaluation frameworks with Cohen's kappa, macro F1, and bootstrap CI.
- Published research on multimodal AI for education.

Education

M.Sc. in Computer Science

Federal University of Pelotas (UFPel) | Mar 2024 - Present

B.Sc. in Computer Science

Federal University of Pelotas (UFPel) | Jun 2017 - Dec 2023

Technical Diploma in Electronics

Instituto Federal Sul-Rio-Grandense | Jun 2014 - Jun 2016
